(1)Keywords :-

Sensitivity – Aesthetical Sensitivity, Interpersonal Sensitivity, Vocational Sensitivity

(1)INTRODUCTION :-

According to colmen (1981) 17th Century was known as century of understanding 18th century known for science of reasoning and he consider 20th century as the century of tension. They considered as worries. But now we are living in 2nd decade of 21st century and this is the century of technology. Where the science and technology is developing as jet speed but the human is more insensitive about others and itself like a machine

The words sensitive means to understand and fell the feelings of others, and react towards them positively. A Sensitive human means the person who has the vision and who treats others as a human being.

SENSITIVE MEANS

- Learn how to better understand and appreciate the differences in other people.
- To put themselves into another person's place in hopes that they will be able to better relate to others who are different than they are.
- Awareness of our emotions.
- Keep good relationship and should be maintain it.
- Handling relationship.
- To be sensitive means a person who leaves between two extreme ends of hyper sensitivity and

(5)HYPOTHESIS :-

- (1)There is no significant difference between Aesthetical Sensitivity of boy and girl college students of B. Ed.
- (2)There is no significant difference between Interpersonal Sensitivity of boy and girl college students of B. Ed.
- (3)There is no significant difference between Vocational Sensitivity of boy and girl college students of B. Ed.

(6)METHODOLOGY :-

The survey method was used by the researcher.

(7)LIMITATIONS OF THE STUDY:-

- (1)The area of research is conducted in the area of Surat city only.
- (2)The research work is limited only to the students of B. Ed. Gujarati medium.

(8)SAMPLE DESIGN :-

- (1)For research work the researcher was got the permission from principle of B. Ed. college which is situated at Ghoddod road, Surat.
- (2)The research work was carried out on 100 randomly selected students of Gujarati medium B. Ed. students in which 50 were boys and 50 were girls.

(9)TOOLS USED FOR DATA COLLECTION :-

For above studies are done by the methods of questionnaire by three ways.

Aesthetical, Interpersonal & Vocational Sensitivity are considered is prepared after research scrutinization there questionnaire are prepared & it is considered for use.

(10) STATISTICAL TECHNIQUE :-

Used Mean, S.D.'t' Test.

(11) ANALYSIS AND INTERPRETATION OF DATA :-

As per data received by analysis in statement boys and girls students were analyzed in three ways.

S. No.	Kind of Sensitivity	Boy Students		Girl Students		Results by 't' Test	Level of Significance
		Mean	S. D.	Mean	S. D.		
1	Aesthetical Sensitivity	32.68	5.64	32.34	5.27	0.31	N. S*
2	Interpersonal Sensitivity	30.92	7.14	30.42	5.89	0.38	N. S*
3	Vocational Sensitivity	30.6	6.51	30.76	5.46	0.13	N. S*
Note - * means Non significant at level of 0.05							

The result of above table shows us that there wasn't any significant difference between the boy and girl students of B. Ed. College Aesthetical sensitivity, Interpersonal Sensitivity, Vocational Sensitivity . The result also shows us that there was similarity between them Aesthetical sensitivity, Interpersonal Sensitivity, Vocational Sensitivity. So on that basis the Hypothesis No-1, 2 and 3 were accepted.

CONCLUSION:-

- (1) There is no significant difference between Aesthetical sensitivity of the B. Ed. college student boys and girls.
- (2) There is no significant difference between Interpersonal Sensitivity of the B. Ed. college student boys and girls.
- (3) There is no significant difference between Vocational Sensitivity of the B. Ed. college student boys and girls.
