## STUDENTS ROLE IN QUALITY IMPROVEMENT IN HIGHER EDUCATION

AMOL SINGH DASHRATH SINGH GUATAM

Research Scholar J.J.T. University, Jhunjhunu (Rajasthan)

### Abstract:

*Indian Constitution role in education system is Important because every citizen right to education granted for constitution. The center and state programs implementation state indies, programs are in SERVA SHIKSHA ABHIYAN primary the education are compulsory. India is largest democracy country in the world. There are two government is central and state both fundamental rights and duties granted for the Indian people. The poor people's are granted for facilities in government sector.*

### LEARNING, TEACHING IN HIGHER EDUCATION: -

There's difference in Indian ancient and medieval age education system comparing with today advance education system. Before arrival of British in this country education was a limited to special class only. In British period government opened education for each person making generalization of education. Behind this their expectation that government needed employs' in their addition work. So British government opened oppurnatity for each and every person. Before that learning and teaching was right of specific class only.

In India in 19 century education system implemented correctly. In teaching, learning process student is at the centre. In higher education it is said that teacher's role is very important and decision making if some engineer made faults while construction of building them there was loss of that particular building, dam, bridge etc. If some doctor fail to complete his duty then there was loss of patient. But some teacher fail in his duty than there will be loss of generation and generation this fact we cannot reject or ignore similar to teacher role in teaching learning process. There is much impartment with his role of student in this new education system. Because today's education system is student centric.

In higher education to improve quality there are continuously taking efforts by teachers. Central government established NAAC (National assessment and Acieration council) for quality development. There is no compromise in quality of higher education. Such stand given by central human and resource minister of India for that student's role is also very important. In accent Greek country there was intelligent student's such as Pluto, Aristotle etc. who has command on various subject they can learning each and every subject with great inarch stimuli tenuously. This student having rich attitude for seeking knowing. In various subject until such thrust of knowledge and reach attitude not develop in today's student. They cannot contribute for quality development

In higher education is not scoring good marks in examination getting Job's with attractive salaries and so on.

### HIGHER EDUCATION AND SCIENCE :-

it means that student must has knowledge base in place of examination base and this is compulsory for today's education system unfortunately in society this research attained is decreasing. Due to attitude of

knowledge new things student can today's world making development at this level. In this science age human being stepped on moon. Human being make various space progromces successful and fruitful. In Indian born American NASA scientist sunita Williams traveled two times in space program. Due to scientific development she able to take part in American presidential election 2012. She also able to give depawali greeting and best wishes to American and Indian also American Institute NASA aiming to land on mars for residential purpose before 2030. If it become successful this will first events in human history. It is important to make aware students that higher it is important to make aware students that higher education is not a tool for livelihood. It is tool for acquiring knowledge this think is import unstained to the students. India is a important democracy country. So that India ha been known in the world the largest demooory on the earth. In population India know 2nd number in the world as a India in to the democracy number 1 in the world. There is not democracy government in chain but searnilain government availed in china. It meaning that there is not only informant solicit but also quality is important quality is more important than quantity. Higher education and student :- The world level as per research in to the quality level in the highest class in 200 students. But there is not one of the student select from India. That is very bad news for India. If that contusions will be change in India student have participant in higher education is important for India. This is important to know the responsibility, always. The student will gain quality in the higher education. Because there are many students will be taking the admission into the different faculty where as a 50% student not complete their higher education so that the student have present to the regular because for the quality development as per central government, state government, teacher's education society. There are important parts as well as the student is important part in education system. Indian construction is a very important role in our state. The state is important pillar to the student

**CONCLUSION:-**

In brief fact of higher education program developments and implitaiaten of state policy students duty to society, institution parents to take care of student and establishment higher education platforms guidelines for student life and avoid bad habits.

Inverness of higher education in country. The student's are interested in education. Teacher should perform their duties to import to quality of education.
