taluka-mohol, dist-solapur

Abstract:

This paper is an attempt to investigation number of dairy and high require of milks in Solapur district. For the present work, secondary data are used which is collected from economic statistical review Solapur. Dairy industries are based on Agro Industry. Dairy industry plays on important role in economy of a particular region. It is based on a number of cattle's found in a region, particularly, of milk producing cattle. It is responsible for the improvement of economic conditions particularly of the poor people. Solapur district has good potential for the development of dairy industries. The areas which are predominant in rural activities of primary sector

Keyword:

Milk dairy, Production of milks.

INTRODUCTION

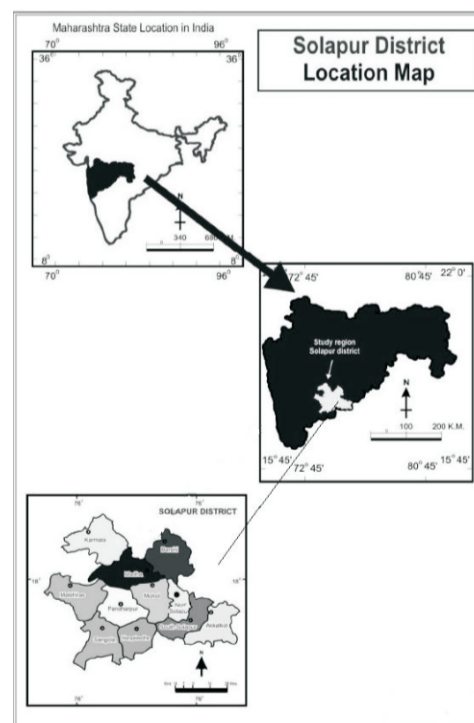

Dairy industry plays on important role in economy of a particular region. It is based on a number of cattle's found in a region, particularly, of milk producing cattle. It is responsible for the improvement of economic conditions particularly of the poor people. Solapur district has good potential for the development of dairy industries. The areas which are predominant in rural activities of primary sector have better potentiality for the development of dairy industry. In the Solapur district particularly Malshiras, Pandharpur, Mohol, Madha, Sangola some other tahsils have favorable climatic and social conditions. for the development this industry. There are seven important milk chilling plants in the Solapur District. As far as investment amount is concerned, the Government milk dairy ranks first among the dairy plants. There is no vast difference in the investment amount of dairy. Chilling capacity of every plant is very high. It ranges from 20,000 liters to 60,000 liters. Collection of milk per day is very low of Sudarshan Milk plant, whereas it is quite high for Sidharth Milk dairy. The unit collect merely 20,000 liters milk per day, whereas Lokmangal Milk dairy collect about 15,000 liters per day. About 150 workers are engaged in Government milk dairy, on the contrary only 17 workers are engaged in Sudharshan Milk Dairy.

STUDY AREA

The district of solapur lies entirely in the Bhima-Sina-Man basins, just before the Bhima River leaves Maharashtra State to enter into Karnataka State. Bounded by 17° 10' north and 18°32' north latitudes and 74°42' east and 76°15' east longitudes, the district is fairly well-defined to its west as well as to its east by the inward-looking scarps of Phaltan Range and the Osmanabad Plateau, respectively. The adjoining districts are Sangli to its south-west, Satara to its

west, Pune to its north-west, Ahmadnagar to its north, Osmanabad to its east and the Bijapur district in Karnataka State to its south. Though of an irregular shape, the district is roughly squeamish 200 km. east-west and 150 km. north-south. The district has a total area of 15,021 square kilometers.

Map No. 1 map of Solapur district.

OBJECTIVES

1. To analysis of number daries in Solapur District
2. To study volume change of daries in Soalpur District

RESEARCH METHODOLOGY

The study is based on secondary data from the respective Solapur Indian Metrological Department, Agricultural Department of Solapur District From books, journals, magazines and report based.
