A COMPARATIVE STUDY OF EFFECT OF MOBILE PHONE ON GOVT. AND PRIVATE SCHOOL (X CLASS) IN THANESAR CITY

Mrs. Vandana Kumari

Assistant Professor , Deptt. of Sociology (K.U.K.)

ABSTRACT

Media is a very sensitive instrument of communication which has two major manifest intention one of providing information and another of entertainment to the public. Mobile phone is the most popular mean of communication in present scenario. In this study we come to know that using mobile phone effects on the student 52(43%) student spend more time in using mobile phone 43% students used mobile at late night, 59 (49%) students have account on social media Respondent are also used mobile phone as study purpose and entertainment.

KEY WORD- Mobile Phone, Communication, Study, Entertainment, Daily Life, Effects.

INTRODUCTION :

Man's need for communication is as strong and as basic his need to eat, sleep and love. It is an individual and

social need. It is both a natural individual demand and a requirement of social existence to use communication resources in order to engage in the sharing of experiences, Thought symbol-mediated, interaction, communication involves active interaction with our environments- physical, biological and social. According to Denis MC Quail. "Communication is a process with increase commonality". Communication is the medium of Transmitting Information, ideas and attitudes from one person to another. Communication may take place between a group and an individual, A collective society and one person or a society and a group. A modern man has built a variety of machinery for delivering his message via newspaper, radio, camera, television, film, computer and phone etc. and binding time and space to his will. How it will be utilized in day to day routine life for informing, entertaining, frightening, convincing, inspiring and such other purposes. There are so many sources of communication are available in our life But mobile phone is the most popular and famous tools of communication is present scenario. An increasing of people using cell phone day by day. Most of the people spend much of their time on using mobile phone. It is used by almost people of all ages. "A mobile phone (also known as a wireless phone, cell phone or cellular telephone) is a small portable radio telephone. The mobile phone can be to communicate overlong distances without wires. Mobile Phone not only a medium of communication. It is multifunction's and multifacilities tool. Now a days mobile phone used to information, entertainment, social media, mobile banking, Research work etc makes our life easier. Although mobile phone shows us many advantages. It also brings us some disadvantages. According to the recant research from the university of Hafia 95% of high school student are using phones at school. Many study relives that students use phone in various way to surf the internet, to access social

networks like facebook, twitter, and whatsapp, to stream videos, songs and playing games. Many research reveals that teen use more time in mobile phone and so many good or bad effects on school going students. So we may find the effect of mobile phone on school going students. Throw this study.

OBJECTIVES-

1. To find out the social, economic background of the respondents.
2. To find out the use of mobile phone as a study purpose.
3. To fine out the effects of mobile phone on respondents.

METHODOLOGY -

Both primary and secondary data were used in this study. We have prepared interview schedule that contains question related to our objectives of the study. In our study I have selected four school two is Govt. and two is private is located near by Kurukshetra University. We have randomly selected 120 (X Class) students. We have decided to selected 30 student in each school in which included both boys and girls. In this study we have selected 67 male respondents 36 of govt. School and 31 of private school and 53 female respondent 24 of Govt. school and 29 is private schools.
