Abstract :

A kitchen is a part of a room used for cooking. The main function of a kitchen is cooking, however it may also be used for dining, storage entertaining, dishwashing and laundry .Planning a kitchen is very important. A kitchen can be more than just a place to prepare meals. For many families, it's the heart of the home and "nerve centre" where family members gather to talk, work, eat meals and sometimes even entertain guests especially if they are close friends.

Factors Influencing The Selection And.....

INTRODUCTION

The kitchen is one of the busiest and most expensive rooms in the home and it should be planned to save time and energy for those who work in it. A well planned kitchen can prevent hazards that might cause fatal accidents and at the same time it can also provide a pleasant environment for family members. Kitchens allow the cook to express the culinary skills and are any gourmet's paradise. The style and elegance is achieved in kitchen décor within the parameters of convenience and ease.

Modular kitchens are ready kitchens scrupulously designed to fulfil individual needs and adapt to available space. Today modular kitchens have become the common way of life. With the convenience and comfort of ready module, one can avail of modern facilities and maintain a consistency in décor that defines ones personal statement of style. Modular kitchens offer the latest in design and style .they optimizes space and is durable. The traditional kitchens were dingy and unorganised whereas the modular kitchens of today are sleekly designed to suit the individual needs and preference as well as the available space in any home.

METHODOLOGY

Aim – To study the factors contributing to the selection and use of modular kitchens in Bangalore City.

OBJECTIVES

- 1.To know the reasons for installing modular kitchens.
- 2.To know the various uses of modular kitchens.

PROCEDURE

Purposive random sampling was used to select the sample for the study. Sixty homemakers who were using branded modular kitchens were selected from Bangalore City. The homemakers were interviewed with the help of a structured interview schedule. The data collected through interview was analysed by using number and percentage.

RESULTS AND DISCUSSION

A majority of the respondents that is 40 % were in the age group of 30-40 years, 28% in the age group of 40-50 years and 17% in the age group of 20-30 years. About 15 % were above 50 years.

**TABLE -1
REASONS FOR INSTALLATION OF KITCHEN**
