How to Write Articles

Here are a few basic steps to take to craft an interesting, informative article.

Method 1 of 3: Come Up With An Idea

1.Get to know your audience. Decide who you need to write for before proceeding with planning or writing an article. Identify the needs of your readership. What do your readers need to know? How does your own knowledge matchup against the information they need? This will be the easiest way for you to find a topic to write about

2.Be unique. If you are writing an article about something that other people are also writing about, try to be unique in how you approach the material

3.Be passionate. You should care about the topic you choose to write about. Your enthusiasm will show in your writing and it will be much more engaging for your readers

Method 2 of 3: Research Your Idea

1.Learn the basics. Get the general explanation of whatever you are trying to write about. This will give you a basic framework for what to look for as you research.

2. Find reliable sources. Now that you know what to look for, research your topic. You can use the internet, a library, conduct interviews, watch documentaries, or whatever you feel is appropriate to teach you everything you need to know about your topic. Be an expert!

3.Get different types of material. During your research, look for material that isn't text. This can be used or altered to add to your article.

Method 3 of 3: Write Your Article

1.Decide your length. Does this article have a word count? Do you need to fill a certain number of pages? Consider what type of content you're writing about and how much space that can fill, as well as how much needs to be written in order to cover the topic adequately, before proceeding with writing your article.

2.Outline your article. Before you begin formal writing, you will want to outline your article.

3.Edit your work. Before you submit your work, you will want to do some editing and revision. If time allows, wait for a day or two before editing

4.Respect the rights of other writers. If you are using information from an external source, be sure to cite the source at the bottom of the article.

5.Submit your work. When you've finished, submit your work in the appropriate manner.

ABSTRACT:

The purpose of the study is to understand the effect of inclusive education for persons with intellectual disabilities associated with cerebral palsy from successful journey of isolation to inclusion. This study investigated the pedagogy of including children with intellectual disabilities associated with cerebral palsy in inclusive education. This study was carried out on 3 children in the age group of 3 to 6 years who are getting services from special education school at Thakur Hari Prasad Institute of Research and Rehabilitation for the mentally handicapped, Hyderabad.

Abstract Report: The Title Accurately Said The Study was About.

INTRODUCTION:

Education is a necessary part of human development which helps in understanding the dynamics of the socio-political frame of society. Thereby, education not only prepares people to search the meaning and value of the existence and development of the people, but also the well being of the society. In regard to person with disabilities, especially multiple disability category it adds greater meaning.

Introduction Report: This Article Include Full Introduction, Methods, Results & Introduction Section.

METHODS & MATERIALS:

All the information was collected from various rehabilitation professionals who assessed clients at the time of admission. Following initial interventional programmes' were carried out to develop and strengthen pre-requisite skill for school readiness.

Methods & Materials Report: Tables/Boxes/Diagram & Images are Used to Explain Specific Points or Background Information. Figures That The Plotted Parameters are Clearly Mentioned.

RESULT:

From the above case studies shows that all the three Children showed significant improvements in the area mentioned and portrayed in Figure No- 1, 2 and 3. In that the areas of personal, academics, social, occupational had been taken into account. Once in every three months reassessment has been made for all the cases by using FACP, and provided training by adapting multisensory approaches, play way methods, auditory integration therapy, prompting, modeling and reinforcement modeling.

Result Report: Figures are Imported to Provide Explanation for Background Information. Conclusion of This Paper Clearly Supported Results.

DISCUSSION:

Third quarterly evaluation revealed drastic improvements to the extent and they were selected for mainstreaming in the normal school. Parents were counseled regarding the children's condition. The 3 children were integrated in normal school is due course of time. Even though the child had mainstreamed in the school, the intervention from multidisciplinary team will continued still resulting in a significant improvement in the child condition.

Discussion Report: The Text is Rounded off with a Conclusion that Discusses the Implication of The Findings & Ideas Discussed & Their Impact on Future Research Direction.
