### How to Write Articles

Here are a few basic steps to take to craft an interesting, informative article.

#### Method 1 of 3: Come Up With An Idea

1. Get to know your audience. Decide who you need to write for before proceeding with planning or writing an article. Identify the needs of your readership. What do your readers need to know? How does your own knowledge matchup against the information they need? This will be the easiest way for you to find a topic to write about
2. Be unique. If you are writing an article about something that other people are also writing about, try to be unique in how you approach the material
3. Be passionate. You should care about the topic you choose to write about. Your enthusiasm will show in your writing and it will be much more engaging for your readers

#### Method 2 of 3: Research Your Idea

1. Learn the basics. Get the general explanation of whatever you are trying to write about. This will give you a basic framework for what to look for as you research.
2. Find reliable sources. Now that you know what to look for, research your topic. You can use the internet, a library, conduct interviews, watch documentaries, or whatever you feel is appropriate to teach you everything you need to know about your topic. Be an expert!
3. Get different types of material. During your research, look for material that isn't text. This can be used or altered to add to your article.

#### Method 3 of 3: Write Your Article

1. Decide your length. Does this article have a word count? Do you need to fill a certain number of pages? Consider what type of content you're writing about and how much space that can fill, as well as how much needs to be written in order to cover the topic adequately, before proceeding with writing your article.
2. Outline your article. Before you begin formal writing, you will want to outline your article.
3. Edit your work. Before you submit your work, you will want to do some editing and revision. If time allows, wait for a day or two before editing
4. Respect the rights of other writers. If you are using information from an external source, be sure to cite the source at the bottom of the article.
5. Submit your work. When you've finished, submit your work in the appropriate manner.

## ABSTRACT:

The study was undertaken to analyse the effectiveness of CD as a supporting material to communicate Emily Bronte's novel 'Wuthering Heights' successfully and effectively to T.Y.B.A. (English Special) students of 'Single Group'. The researcher selected 25 students who are regular in the class from the English department of two different colleges and formed 'Single Group'.

**Abstract Report:** The Title Accurately Said The Study was About.

## INTRODUCTION:

The paper highlights the effectiveness of CD as a supporting material in successful communication of Emily Bronte's novel 'Wuthering Heights'. Teaching - learning process involves numerous methods. 'Self-study' is one of them. But it has some limitations and shortcomings. To overcome them, the researcher determined to develop a CD so as to result in maximum comprehension of the novel.

**Introduction Report:** This Article Include Full Introduction, Methods, Results & Introduction Section.

## METHODS & MATERIALS:

The five day conventional algal bioassay test is carried out to assay the toxicity of heavy metal. The toxicity response of alga towards copper, lead and Chromium to access LC 50 or EC50 concentration. Most algal bioassays are growth inhibition tests, which measure the decrease in growth rate (cell division rate) or final cell biomass.

**Methods & Materials Report:** Tables/Boxes/Diagram & Images are Used to Explain Specific Points or Background Information. Figures That The Plotted Parameters are Clearly Mentioned.

## RESULT:

Like all living organisms, plants are often sensitive both to the deficiency and to the excess availability of some heavy metal ions as essential micronutrient, while the same at higher concentrations and even more ions such as Cd, Hg, as are strongly poisonous to the metabolic activities. Researchers have been conducted throughout the world to determine the effects of toxic heavy metals on plants (Reeves and Baker 2000; Fernandes and Henriques 1991).

**Result Report:** Figures are Imported to Provide Explanation for Background Information. Conclusion of This Paper Clearly Supported Results.

## CONCLUSION

'Self-Study' is useful in reading just the story of the novel. The students can read the novel on their own using their ability, speed, etc. But analysis of different aspects of the novel such as plot, theme, narrative technique, structure, etc. is a difficult job. The structure of this novel is complex. The students couldn't understand it just by 'self-study'. The above made points could be simplified and explained in detail with the help of CD.

**Discussion Report:** The Text is Rounded off with a Conclusion that Discusses the Implication of The Findings & Ideas Discussed & Their Impact on Future Research Direction.

## RECOMMENDATIONS:

**Abstract Report:** Introduce New Regular For Content & Communication.

## SUMMARY OF ARTICLE:

	Very	High	Average	Low	Very Low
1. Interest of the topic to the readers	✓				
2. Originally & Novelty of the ideas	✓				
3. Importance of the proposed ideas		✓			
4. Timelines	✓				
5. Sufficient information to support the assertions made & conclusion drawn		✓			
6. Quality of writing(Organization, Clarity, Accuracy Grammer)	✓				
7. References & Citation(Up-to-date, Appropriate Sufficient)			✓		

**This Article is Innovative & Original, No Plagiarism Detected**
