#### How to Write Articles

Here are a few basic steps to take to craft an interesting, informative article.

##### Method 1 of 3: Come Up With An Idea

1. Get to know your audience. Decide who you need to write for before proceeding with planning or writing an article. Identify the needs of your readership. What do your readers need to know? How does your own knowledge matchup against the information they need? This will be the easiest way for you to find a topic to write about

2. Be unique. If you are writing an article about something that other people are also writing about, try to be unique in how you approach the material

3. Be passionate. You should care about the topic you choose to write about. Your enthusiasm will show in your writing and it will be much more engaging for your readers

##### Method 2 of 3: Research Your Idea

1. Learn the basics. Get the general explanation of whatever you are trying to write about. This will give you a basic framework for what to look for as you research.

2. Find reliable sources. Now that you know what to look for, research your topic. You can use the internet, a library, conduct interviews, watch documentaries, or whatever you feel is appropriate to teach you everything you need to know about your topic. Be an expert!

3. Get different types of material. During your research, look for material that isn't text. This can be used or altered to add to your article.

##### Method 3 of 3: Write Your Article

1. Decide your length. Does this article have a word count? Do you need to fill a certain number of pages? Consider what type of content you're writing about and how much space that can fill, as well as how much needs to be written in order to cover the topic adequately, before proceeding with writing your article.

2. Outline your article. Before you begin formal writing, you will want to outline your article.

3. Edit your work. Before you submit your work, you will want to do some editing and revision. If time allows, wait for a day or two before editing

4. Respect the rights of other writers. If you are using information from an external source, be sure to cite the source at the bottom of the article.

5. Submit your work. When you've finished, submit your work in the appropriate manner.

## ABSTRACT:

The Indian Tourism Industry has flourished in the past few years, significantly contributing to the nation's Development, Gross Domestic Product, Foreign Exchange Earnings and Employment. India with her enriched beauty is unambiguously one of the most viable candidates for promoting tourism.

**Abstract Report:** Title is academic and sounding name.

## INTRODUCTION:

Tourism is travel for recreational, leisure or business purposes. The Word "Tourism" defines tourists as people who "travel to and stay in places outside their usual environment for more than twenty-four (24) hours and not more than one consecutive year. Among the various service industries, tourism in India is the largest and fastest growing in the country.

**Introduction Report:** This article include full introduction, methods and results and discussion section.

## METHODS & MATERIALS:

The research is based on the analysis of relevant reports of Tourism Development Corporation, newspapers, plans, previous studies, and other documentation, together discussions made with tourism authorities and also field visits undertaken in 2011 and 2012.

**Methods & Materials Report:** Figures that the plotted parameters are clearly mentioned.

## RESULT:

Must add the result to your article.

**Result Report:** Result is blank.

## DISCUSSION:

Tourism appeared as a clean industry associated with a higher economic multiplier as a service sector. It is for this reason that development of tourist facilities and recreational opportunities has normally been viewed as a positive contribution to the national balance of payments (Mathieson, A., and Wall, G. 1982). Moreover, tourism seems to be more effective than other industries in generating employment and income.

**Discussion Report:** The main text is organized that background information and new findings follow on from each other in clean and logical way.
