**How to Write Articles-**

Here are a few basic steps to take to craft an interesting, informative article.

**Method 1 of 3: Come Up With An Idea**

1. Get to know your audience. Decide who you need to write for before proceeding with planning or writing an article. Identify the needs of your readership. What do your readers need to know? How does your own knowledge match up against the information they need? This will be the easiest way for you to find a topic to write about
2. Be unique. If you are writing an article about something that other people are also writing about, try to be unique in how you approach the material
3. Be passionate. You should care about the topic you choose to write about. Your enthusiasm will show in your writing and it will be much more engaging for your readers

**Method 2 of 3: Research Your Idea**

1. Learn the basics. Get the general explanation of whatever you are trying to write about. This will give you a basic framework for what to look for as you research.
2. Find reliable sources. Now that you know what to look for, research your topic. You can use the internet, a library, conduct interviews, watch documentaries, or whatever you feel is appropriate to teach you everything you need to know about your topic. Be an expert!
3. Get different types of material. During your research, look for material that isn't text. This can be used or altered to add to your article.

**Method 3 of 3: Write Your Article**

1. Decide your length. Does this article have a word count? Do you need to fill a certain number of pages? Consider what type of content you're writing about and how much space that can fill, as well as how much needs to be written in order to cover the topic adequately, before proceeding with writing your article.
2. Outline your article. Before you begin formal writing, you will want to outline your article.
3. Edit your work. Before you submit your work, you will want to do some editing and revision. If time allows, wait for a day or two before editing
4. Respect the rights of other writers. If you are using information from an external source, be sure to cite the source at the bottom of the article.
5. Submit your work. When you've finished, submit your work in the appropriate manner.

## ABSTRACT:

Through his The Study of Poetry, Arnold innovated a method of literary analysis popularly known as the 'touchstone method' where by a text is compared with classical text or some part of it to judge the worth of the present text in analysis. The method has its advantages and disadvantages in the field of literary analysis. This paper attempts to explore connections between Arnold's Touchstone Method and the process of production of literature. The paper also attempts to focus on different aspects which influence the author and ultimately his/ her writing.

**Abstract Report:** The Title Accurately Said The Study was About.

## INTRODUCTION:

Matthew Arnold in his essay Function of Criticism says, 'the grand work of literary genius is a work of synthesis and exposition, not of analysis and discovery; its gift lies in the faculty of being happily inspired by a certain intellectual and spiritual atmosphere, by a certain order of ideas, when it finds itself in them; of dealing divinely with these ideas, presenting them in the most effective and attractive combinations,- making beautiful works with them (1914, p. 12). He uses several words which create questions in our minds.

**Introduction Report:** This Article Include Full Introduction, Methods, Results & Introduction Section.

## METHODS & MATERIALS:

Must add methods and materials in your article.

**Methods & Materials Report:** Methods and materials reports are blank.

## RESULT:

Must add result in your article.

**Result Report:** Result reports is blank.

## DISCUSSION:

Must add discussion in your article

**Discussion Report:** Discussion report is blank.
