How to Write Articles-

Here are a few basic steps to take to craft an interesting, informative article.

Method 1 of 3: Come Up With An Idea

1. Get to know your audience. Decide who you need to write for before proceeding with planning or writing an article. Identify the needs of your readership. What do your readers need to know? How does your own knowledge match up against the information they need? This will be the easiest way for you to find a topic to write about
2. Be unique. If you are writing an article about something that other people are also writing about, try to be unique in how you approach the material
3. Be passionate. You should care about the topic you choose to write about. Your enthusiasm will show in your writing and it will be much more engaging for your readers

Method 2 of 3: Research Your Idea

1. Learn the basics. Get the general explanation of whatever you are trying to write about. This will give you a basic framework for what to look for as you research.
2. Find reliable sources. Now that you know what to look for, research your topic. You can use the internet, a library, conduct interviews, watch documentaries, or whatever you feel is appropriate to teach you everything you need to know about your topic. Be an expert!
3. Get different types of material. During your research, look for material that isn't text. This can be used or altered to add to your article.

Method 3 of 3: Write Your Article

1. Decide your length. Does this article have a word count? Do you need to fill a certain number of pages? Consider what type of content you're writing about and how much space that can fill, as well as how much needs to be written in order to cover the topic adequately, before proceeding with writing your article.
2. Outline your article. Before you begin formal writing, you will want to outline your article.
3. Edit your work. Before you submit your work, you will want to do some editing and revision. If time allows, wait for a day or two before editing
4. Respect the rights of other writers. If you are using information from an external source, be sure to cite the source at the bottom of the article.
5. Submit your work. When you've finished, submit your work in the appropriate manner.

ABSTRACT:

After food settlement is the most important need of man .men construct houses and develop settlements to protect themselves against the vagarious of weather and to enjoy social life.In fact settlement isman's most important base for adaptation with his physical as well as cultural environment. Housing occupies a most important place in the problem of welfare of the people. It is a matter of the almost importance in the social welfare of the city also.

Abstract Report: The Title Accurately Said The Study was About.

INTRODUCTION:

OBJECTIVES-

In the light of what has been discussed above the researcher has interested in an interdisciplinary comparative study of the slums of Solapur city with special emphasis on the following objectives:-

- 1] To look in to the problems of the slums in Solapur city.
- 2] To understand the nature of interaction between life changes and life styles of slum dwellers in different contexts.
- 3] to examine the impacts of environmental problems on slum dwellers.

Introduction Report: This Article Include Full I ntroduction, Methods, Results & I ntroduction Section.

METHODS & MATERIALS:

The study is based on both primary and secondary data. Living conditions of slum dwellers is depicted using primary data. Gautam nagar (Garibi hataav) slum which is oldest and one of the largest slums in Solapur city has been selected for sample survey. The survey questionnaire includes physical environment with facilities using for the various needs. For this study, total 100 samples using purposive sampling to investigate.

Methods & Materials Report: Tables/Boxes/Diagram & Images are Used to Explain Specific Points or Background I nformation. Figures That The Plotted Parameters are Clearly Mentioned.

RESULT:

In this way the slum population of Sholapur city increases very rapidly but comparatively, basic services are remains less. So that pressure increases on administrative authority. Water, air and noise pollution with deforestation and issue of garbage disposal increases in slum area of Sholapur city than we imagine. Implementation of the solution on these environmental problems is very necessary for the healthy Sholapur. Otherwise in future it becomes headache in the development of city planning processes.

Result Report: Figures are I mported to Provide Explanation for Background I nformation. Conclusion of This Paper Clearly Supported Results.
