ABSTRACT:

The purpose of this study was to make survey of awareness and attitude of CBSC Board School Children's toward the selected government health programme. The sample of the present study was drawn from CBSE Board school children's of Allahabad and Gurgaon district with the mean age of 17 (± 2). A questionnaire based study was conducted. The questionnaire comprised of 30 questions covering six government health programmes: (a) National Anti Malaria Programme (b) National Aids Control Programme (c) National Programme for Control of Blindness (d) Iodine Deficiency Disorders (IDD) programme (e) Universal Immunization programme, (f) National Family Welfare Programme. The percentile method was used in the analysis of the results. The majority of the respondents were positive it was hypothesized the most of school children's were aware and had a positive attitude towards Government Health Programmes.

Abstract Report: The Title Accurately Said The Study was About.

INTRODUCTION:

Teenage is the age of learning and it is the time when a school going teenager start developing practices and awareness towards health. It is very important to target the teenagers for health awareness and knowledge about different communicable and non-communicable diseases.

Since India become free, several measures have been undertaken by the National Government to improve the health of people. Prominent among these measures are the national health program, which have been launched by the central Government for the control/eradication of communicable diseases, improvement of environmental sanitation and improving school health program.

Introduction Report: This Article Include Full Introduction, Methods, Results & Introduction Section.

OVERVIEW:

- Significance Of The Study
- Procedure
- Delimitations
- Limitations
- Selection And Modification Of Questionnaire
- Statistical Procedure
- Analysis And Interpretation Of Data

Overview Report: Figures are Imported to Provide Explanation for Background Information. Conclusion of This Paper Clearly Supported Results.

DISCUSSION:

After analysing the data researcher finds that the CBSE school going teenagers are aware and have positive attitude towards Government health programme in Allahabad district and Gurgaon district.

This positive attitude and awareness are due to the curriculum of CBSE schools. CBSE schools have enough material to teach the students in their curriculum. And teachers of Physical and Health Education are creating awareness among the students as their curriculum includes National Health Programmes.

Discussion Report: The Text is Rounded off with a Conclusion that Discusses the Implication of The Findings & Ideas Discussed & Their Impact on Future Research Direction.
