How to Write Articles-

Here are a few basic steps to take to craft an interesting, informative article.

Method 1 of 3: Come Up With An Idea

1. Get to know your audience. Decide who you need to write for before proceeding with planning or writing an article. Identify the needs of your readership. What do your readers need to know? How does your own knowledge match up against the information they need? This will be the easiest way for you to find a topic to write about.
2. Be unique. If you are writing an article about something that other people are also writing about, try to be unique in how you approach the material.
3. Be passionate. You should care about the topic you choose to write about. Your enthusiasm will show in your writing and it will be much more engaging for your readers.

Method 2 of 3: Research Your Idea

1. Learn the basics. Get the general explanation of whatever you are trying to write about. This will give you a basic framework for what to look for as you research.
2. Find reliable sources. Now that you know what to look for, research your topic. You can use the internet, a library, conduct interviews, watch documentaries, or whatever you feel is appropriate to teach you everything you need to know about your topic. Be an expert!
3. Get different types of material. During your research, look for material that isn't text. This can be used or altered to add to your article.

Method 3 of 3: Write Your Article

1. Decide your length. Does this article have a word count? Do you need to fill a certain number of pages? Consider what type of content you're writing about and how much space that can fill, as well as how much needs to be written in order to cover the topic adequately, before proceeding with writing your article.
2. Outline your article. Before you begin formal writing, you will want to outline your article.
3. Edit your work. Before you submit your work, you will want to do some editing and revision. If time allows, wait for a day or two before editing.

Happy Writing...

Happy Writing...

ABSTRACT:

The term 'Discourse analysis' originated in the early 1970, constituting many disciplines such as linguistics, rhetoric, Semiotics, Cultural anthropology, Sociology and other a variety of new interdisciplinary research fields. From its beginning this term attracted the attention of scholars in the field of linguistics and applied linguistics as it is mainly deal with the study of relationship between language and context in which it is used.

Abstract Report: The Title Accurately Said The Study was About.

INTRODUCTION:

The Schiff bases and their metal complexes have wide applications in biological systems, biochemical processes, polymers, dyes, homogeneous catalysis, synthetic – structural research etc. Schiff bases and their metal complexes have aroused considerable attention, mainly because of preparative accessibility and structural variability (1, 2) Schiff bases play an important role in both synthetic and structural research.

Introduction Report: This Article Include Full Introduction, Methods, Results & Introduction Section.

METHODS & MATERIALS:

Must add Methods & Materials in your article.

Methods & Materials Report: Methods & Materials Report are blank.

RESULT:

Must add Result in your article.

Result Report: Result Report is blank.

DISCUSSION:

Must add discussion in your article..

Discussion Report: Discussion Report is blank.
