How to Write Articles-

Here are a few basic steps to take to craft an interesting, informative article.

Method 1 of 3: Come Up With An Idea

1. Get to know your audience. Decide who you need to write for before proceeding with planning or writing an article. Identify the needs of your readership. What do your readers need to know? How does your own knowledge match up against the information they need? This will be the easiest way for you to find a topic to write about
2. Be unique. If you are writing an article about something that other people are also writing about, try to be unique in how you approach the material
3. Be passionate. You should care about the topic you choose to write about. Your enthusiasm will show in your writing and it will be much more engaging for your readers

Method 2 of 3: Research Your Idea

1. Learn the basics. Get the general explanation of whatever you are trying to write about. This will give you a basic framework for what to look for as you research.
2. Find reliable sources. Now that you know what to look for, research your topic. You can use the internet, a library, conduct interviews, watch documentaries, or whatever you feel is appropriate to teach you everything you need to know about your topic. Be an expert!
3. Get different types of material. During your research, look for material that isn't text. This can be used or altered to add to your article.

Method 3 of 3: Write Your Article

1. Decide your length. Does this article have a word count? Do you need to fill a certain number of pages? Consider what type of content you're writing about and how much space that can fill, as well as how much needs to be written in order to cover the topic adequately, before proceeding with writing your article.
2. Outline your article. Before you begin formal writing, you will want to outline your article.
3. Edit your work. Before you submit your work, you will want to do some editing and revision. If time allows, wait for a day or two before editing
4. Respect the rights of other writers. If you are using information from an external source, be sure to cite the source at the bottom of the article.
5. Submit your work. When you've finished, submit your work in the appropriate manner.

Happy Writing...

Happy Writing...

ABSTRACT:

The leather making process is in general restricted to batch processing, but if the surface coating sub-process is added then some continuous processing can be included. The operation flow has to follow the preparatory tanning crusting surface coating sub process order without deviation but some of the sub-processes can be omitted to make certain leathers.

Abstract Report: The Title Accurately Said The Study was About.

INTRODUCTION:

Leather Industry is the One of most important, export orientated and economic development sector in Bangladesh. And other hand due to un-safe processing of raw leather, discharge of effluents with flashes along with solid waste of leather directly to the soil and in the river Buriganga (heart of the Capital City Dhaka) is a big challenge to safe water environmental and sanitation following the "World Summit for Sustainable Development (WSSD)".

Introduction Report: This Article Include Full Introduction, Methods, Results & Introduction Section.

METHODS & MATERIALS:

This paper deals with respondents' realization on pollution of drinking water and reasons for pollution of drinking water consequent upon tannery industrial activities in Ambur region Vellore district, Tamil Nadu. In this study six villages are selected from the Ambur taluk. The selected villages have high concentration of tannery and leather industrial activities.

Methods & Materials Report: Tables/Boxes/Diagram & Images are Used to Explain Specific Points or Background Information. Figures That The Plotted Parameters are Clearly Mentioned.

RESULT:

Must add result in your article.

Result Report:Result reports is blank.

CONCLUSION :

It could be seen clearly from the above discussion that the respondents cite the first order reason of drinking water pollution consequent upon improper monitoring the activity tannery industries, reason of accumulation of tannery waste in public lands and it result in pollution of drinking water consequent upon tannery effluents the second.

Conclusion Report: The Text is Rounded off with a Conclusion that Discusses the Implication of The Findings & Ideas Discussed & Their Impact on Future Research Direction.
