**How to Write Articles-**

Here are a few basic steps to take to craft an interesting, informative article.

**Method 1 of 3: Come Up With An Idea**

1. Get to know your audience. Decide who you need to write for before proceeding with planning or writing an article. Identify the needs of your readership. What do your readers need to know? How does your own knowledge matchup against the information they need? This will be the easiest way for you to find a topic to write about
2. Be unique. If you are writing an article about something that other people are also writing about, try to be unique in how you approach the material
3. Be passionate. You should care about the topic you choose to write about. Your enthusiasm will show in your writing and it will be much more engaging for your readers

**Method 2 of 3: Research Your Idea**

1. Learn the basics. Get the general explanation of whatever you are trying to write about. This will give you a basic framework for what to look for as you research.
2. Find reliable sources. Now that you know what to look for, research your topic. You can use the internet, a library, conduct interviews, watch documentaries, or whatever you feel is appropriate to teach you everything you need to know about your topic. Be an expert!
3. Get different types of material. During your research, look for material that isn't text. This can be used or altered to add to your article.

**Method 3 of 3: Write Your Article**

1. Decide your length. Does this article have a word count? Do you need to fill a certain number of pages? Consider what type of content you're writing about and how much space that can fill, as well as how much needs to be written in order to cover the topic adequately, before proceeding with writing your article.
2. Outline your article. Before you begin formal writing, you will want to outline your article.
3. Edit your work. Before you submit your work, you will want to do some editing and revision. If time allows, wait for a day or two before editing
4. Respect the rights of other writers. If you are using information from an external source, be sure to cite the source at the bottom of the article.
5. Submit your work. When you've finished, submit your work in the appropriate manner.

### ABSTRACT:

Risk management is a rapidly developing discipline and there are many varied views and description of what risk management involves, how it should be conducted and what it is for. Risk management should be continuous and developing process which runs throughout the organizations strategy and the implementation of that strategy.

**Abstract Report:** The Title Accurately Said The Study was About.

### INTRODUCTION:

The Risk management standard is the result of work by a team drawn from the major risk management organizations in the UK- the Institute of risk management (IRM), The Association of Insurance and Risk Managers (AIRMIC) and ALARM. The National Forum for Risk Management in the Public Sector. In addition, the team sought the views and opinions of a wide range of other professional bodies with interest in risk management, during an extensive period of consultation.
