ABSTRACT:

The present study deals with measuring of the level of self-concept of IX and X Urdu and Marathi medium economically deprived students.

Abstract Report: The Title Accurately Said The Study was About.

INTRODUCTION:

Human behavior is determined by both biogenic and socio-genic needs. In other words individual's behavior is determined by such motives as hunger, thirst, sleep, avoidance of injury and also by certain social attitudes, norms and values.

Introduction Report: This Article Include Full Introduction, Methods, Results & Introduction Section.

METHODS & MATERIALS:

Normative Survey Method is applied.

Methods & Materials Report: Tables/Boxes/Diagram & Images are Used to Explain Specific Points or Background Information. Figures That The Plotted Parameters are Clearly Mentioned.

RESULT:

(1)Table No. 1 shows that calculated mean value of IX standard Urdu medium economically deprived students is 84.28 which comes between the range of 49 – 96 as per the Norm Table. It indicates below average self-concept.

Result Report: Figures are Imported to Provide Explanation for Background Information. Conclusion of This Paper Clearly Supported Results.

CONCLUSION:

Both Urdu & Marathi medium students have below average self-concept due to their economic deprivation. Students of IX and X standard belonging to economically deprived class have below average self-concept. There is negative negligible correlation between self-concept and economic deprivation.

Conclusion Report: The Text is Rounded off with a Conclusion that Discusses the Implication of The Findings & Ideas Discussed & Their Impact on Future Research Direction.
