ABSTRACT:

The Health condition of the country is not so good to say since very past. The birth rate, death rate, infant mortality rate was so high in the past in India and the life expectancy rate was too short in comparison to present day. India covers world's 16% population, 18% world's mortality and 20% world's morbidity but covers only 1% health care investment and 2% GDP.

Abstract Report: The Title Accurately Said The Study was About.

INTRODUCTION:

The condition of rural health was not up to the mark in so many states of India and West Bengal is no exception. Moreover, this scenario is become acute in the backward region. Therefore to highlight the real world picture of the block level health scenario, the present study was conducted. Joynagar-I block is very famous and renowned block of South 24 Parganas as well as Sundarban.

Introduction Report: This Article Include Full Introduction, Methods, Results & Introduction Section.

METHODS & MATERIALS:

The present study was conducted with the help of primary and secondary data. Various healths related data was collected from State and District Census Handbook, District Statistical Handbook of South and North 24 Parganas. Field observation and visual interpretation was also helped to analyze the health scenario of the block at a micro level study.

Methods & Materials Report: Tables/Boxes/Diagram & Images are Used to Explain Specific Points or Background Information. Figures That The Plotted Parameters are Clearly Mentioned.

RESULT:

Must add result in your article.

Result Report: Results are as per aims and objective and useful to further research.

CONCLUSION:

The health scenario of the Joynagar-I block is not good enough but the real scenario is not up to the mark at all. The value of health index in HDI and GDI in the contexts of state level scenario with special reference to West Bengal is better now. But the health and nutrition level of the whole West Bengal is in alarming situation. At the end it may be concluded that several internal and external factors affect the health scenario of the block.

Conclusion Report: The Text is Rounded off with a Conclusion that Discusses the Implication of The Findings & Ideas Discussed & Their Impact on Future Research Direction.
