#### How to Write Articles-

Here are a few basic steps to take to craft an interesting, informative article.

#### Method 1 of 3: Come Up With An Idea

1. Get to know your audience. Decide who you need to write for before proceeding with planning or writing an article. Identify the needs of your readership. What do your readers need to know? How does your own knowledge match up against the information they need? This will be the easiest way for you to find a topic to write about
2. Be unique. If you are writing an article about something that other people are also writing about, try to be unique in how you approach the material
3. Be passionate. You should care about the topic you choose to write about. Your enthusiasm will show in your writing and it will be much more engaging for your readers

#### Method 2 of 3: Research Your Idea

1. Learn the basics. Get the general explanation of whatever you are trying to write about. This will give you a basic framework for what to look for as you research.
2. Find reliable sources. Now that you know what to look for, research your topic. You can use the internet, a library, conduct interviews, watch documentaries, or whatever you feel is appropriate to teach you everything you need to know about your topic. Be an expert!
3. Get different types of material. During your research, look for material that isn't text. This can be used or altered to add to your article.

#### Method 3 of 3: Write Your Article

1. Decide your length. Does this article have a word count? Do you need to fill a certain number of pages? Consider what type of content you're writing about and how much space that can fill, as well as how much needs to be written in order to cover the topic adequately, before proceeding with writing your article.
2. Outline your article. Before you begin formal writing, you will want to outline your article.
3. Edit your work. Before you submit your work, you will want to do some editing and revision. If time allows, wait for a day or two before editing
4. Respect the rights of other writers. If you are using information from an external source, be sure to cite the source at the bottom of the article.
5. Submit your work. When you've finished, submit your work in the appropriate manner.

## ABSTRACT:

The Solapur district can be broadly divided into three natural zones, the Eastern zone comprising Barshi, North Solapur, South Solapur and Akkalkot talukas, which has medium to deep black soil, to some extent get assured rainfall, and in this area jowar, bajra and pulses are grown.

**Abstract Report:** The Title Accurately Said The Study was About.

## INTRODUCTION:

There are very little variations in the climate in different parts of the district. The climate is dry and hot in all part of the district, except that portion of Barshi taluka, which lies above the Ghats where it is somewhat coolest than in the rest of the district. The dominant natural factor, which affects the life and economy of the people, is the rainfall.

**Introduction Report:** This Article Include Full Introduction, Methods, Results & Introduction Section.

## METHODS & MATERIALS:

Keeping in mind the above said objectives, we have used the secondary data for to find out the conclusion. Secondary data collected from Socio-Economic Survey Report of Solapur District and Maharashtra Statistical Abstract Part-II. From these sources after collecting the data, we have calculated Three-year average for the year 1975-78, 1995-98 and 2010-13 and then calculated the percentage change over a period.

**Methods & Materials Report:** Tables/Boxes/Diagram & Images are Used to Explain Specific Points or Background Information. Figures That The Plotted Parameters are Clearly Mentioned.

## RESULT:

Must add result in your article.

**Result Report:** Results are as per aims and objective and useful to further research .

## CONCLUSION:

It was observed that, the land use pattern in solapur district over a period was changed. The only area under follow land was increased. While the gross cropped area of the district was declined. At the same time the area not available for cultivation, total other uncultivated land, Net area sown, Area sown more than once etc.

**Conclusion Report:** The Text is Rounded off with a Conclusion that Discusses the Implication of The Findings & Ideas Discussed & Their Impact on Future Research Direction.
