

How to Write Articles-

Here are a few basic steps to take to craft an interesting, informative article.

Method 1 of 3: Come Up With An Idea

1. Get to know your audience. Decide who you need to write for before proceeding with planning or writing an article. Identify the needs of your readership. What do your readers need to know? How does your own knowledge matchup against the information they need? This will be the easiest way for you to find a topic to write about
2. Be unique. If you are writing an article about something that other people are also writing about, try to be unique in how you approach the material
3. Be passionate. You should care about the topic you choose to write about. Your enthusiasm will show in your writing and it will be much more engaging for your readers

Method 2 of 3: Research Your Idea

1. Learn the basics. Get the general explanation of whatever you are trying to write about. This will give you a basic framework for what to look for as you research.
2. Find reliable sources. Now that you know what to look for, research your topic. You can use the internet, a library, conduct interviews, watch documentaries, or whatever you feel is appropriate to teach you everything you need to know about your topic. Be an expert!
3. Get different types of material. During your research, look for material that isn't text. This can be used or altered to add to your article.

Method 3 of 3: Write Your Article

1. Decide your length. Does this article have a word count? Do you need to fill a certain number of pages? Consider what type of content you're writing about and how much space that can fill, as well as how much needs to be written in order to cover the topic adequately, before proceeding with writing your article.
2. Outline your article. Before you begin formal writing, you will want to outline your article.
3. Edit your work. Before you submit your work, you will want to do some editing and revision. If time allows, wait for a day or two before editing
4. Respect the rights of other writers. If you are using information from an external source, be sure to cite the source at the bottom of the article.
5. Submit your work. When you've finished, submit your work in the appropriate manner.

ABSTRACT:

Role of entrepreneurship has been highlighted significantly in the development literature. Entrepreneurship plays an important role in the economic development of a developing economy. In the Indian context also role of entrepreneurship has been very crucial. More than 90% of India.

Abstract Report: The Title Accurately Said The Study was About.

INTRODUCTION:

Women ’s emancipation and their participation in productive activities in economy plays important role in determining the level of development. It has been six decades since the process of the planned economic development of the Indian economy was set in motion. Over the years significant progress has been achieved by India.

Introduction Report: This Article Include Full Introduction, Methods, Results & Introduction Section.

OVERVIEW:

- Definitions
- Entrepreneurship
- Unorganised sector
- Unorganised sector worker
- Home-based worker
- Self-employed worker
- Micro enterprises
- Market-driven micro enterprise
- Entrepreneurship and economic development of India
- Importance of women entrepreneurs in the development of India

Overview Report: Figures are Imported to Provide Explanation for Background Information. Conclusion of This Paper Clearly Supported Results.

CONCLUSION:

Full and balanced development of the nation and establishment of a just society is possible only when women are provided equal position. But the harsh reality is that even in 21st century women experience low status compared to men and are treated less equal to them. The socioeconomic development of a nation cannot be fully realised as long as its women are confined to a subordinate position and their talents are unexplored.

Conclusion Report: The Text is Rounded off with a Conclusion that Discusses the Implication of The Findings & Ideas Discussed & Their Impact on Future Research Direction.
