ABSTRACT

This study was undertaken to examine the self-concept among high school level students managed by the governments and government-aided school. Academic self-concept can be explained as "specific physical, social, temperamental, educational, moral and intellectual skills, representing a person's self-beliefs and self-feelings regarding the academic setting".

REVIEWER COMMENTS

- The work, as with all work advancing from this specific gathering, is generally sound.
- My remarks here are concerned singularly with the association of the composition.
- Thought of these focuses will, I accept, lead to an enhanced report that better shows the key ideas and conclusions.
