ABSTRACT

Sex ratio it is an important indicator to measure the extent of prevailing equity between male and female population at given point of time. Sex ratio is one of the significant demographic development indices, which can determine the status of women in a region or country. The present paper intends to examine the spatial patterns of sex ratio in Sangli district. It is based on the secondary source of data mainly collected from the Census of India district handbooks and socio-economic abstract, 2001 and 2011.

Introduction

It is one of the important social indices to measure the prevailing inequality between males and females and regional imbalances in the overall status and situation of women. Sex ratio is defined as the number of females per 1000 males. In India, sex ratio always unfavorable for females. The preferences for male child and prenatal determination of sex have caused such an advance sex ratio for females in India.

A Good Introduction :-

Depict the significance (importance) of the study - why was this value doing in any case? Give a wide connection. Extremely briefly depict the exploratory configuration and how it achieved the expressed destinations.

Materials

The present study intends to examine the spatial pattern of sex ratio of Sangli district. It is based on the secondary source of data, mainly collected from the Census of India, Socio-Economic Abstract of Sangli District Statistical Abstract of Maharashtra 2000-01, Economic Survey of Maharashtra, 2009-10 and 2012-13. Sex ratio is measured in terms of number of females per thousand males.

A Good Materials :-

Materials may be accounted for in a different passage or else they may be distinguished alongside your systems. In biosciences we habitually work with arrangements - allude to them by name and portray totally, including convergences of all reagents, and pH of watery arrangements, dissolvable if non-fluid.

Result

Must add result in your article.

A Good Result :-

Results are as per aims and objective and useful to further research.

Conclusion

It is concluded that the sex ratio, which is one of the important demographic indicator which is the show the cleared picture of status of women. In the study area the sex ratio has increased from 957 in 2001 to 966 in 2011. At the same time the 0-6 has also been increased.

A Good Conclusion :-

Choose if the trial outline satisfactorily tended to the speculation, and whether it was legitimately controlled. Attempt to offer option clarifications if sensible options exist.

REVIEWER COMMENTS

- Thought of these focuses will, I accept, lead to an enhanced report that better shows the key ideas and conclusions.
- Generally, this is a reasonable, brief, and elegantly composed original copy.
- The presentation is pertinent and hypothesis based.
- Sufficient data about the past study discoveries is displayed for perusers to take after the present study method of reasoning and
