ABSTRACT

Development means a new spatial relationship among members of a community and between them and their environment. The development of socio-economic infrastructure indicates the quality of life of people of a particular area. In view of this, it is necessitated to ascertain tehsil level development in Ratnagiri district considering various socio-economic indicators. The main concern of this study is to insight into the spatio-temporal patterns of development at tehsil level of Ratnagiri district during the last forty years from 1971 - 2011

Designation:-¹Professor, Department of Geography, Shivaji University, Kolhapur.

²Associate Professor and Head, Department of Geography, D. B. J. Collage, Chiplun, Dist. Ratnagiri.

Introduction

Development means a new spatial relationship among members of a community and between them and their environment. It is a national thought for the development of weaker sections of the society through the transformation of the economic and socio-spatial structures of their production activities.

A Good Introduction :-

Depict the significance (importance) of the study - why was this value doing in any case? Give a wide connection. Extremely briefly depict the exploratory configuration and how it achieved the expressed destinations.

Materials

The present study is based on primary and secondary data. For assessing the overall change in the levels of development at tehsils level of Ratnagiri district during 1971, 1981, 1991, 2001 and 2011 and pattern of their development in the sample villages of nine tehsils of Ratnagiri district (2012), composite indexes are constructed.

A Good Materials :-

Materials may be accounted for in a different passage or else they may be distinguished alongside your systems. In biosciences we habitually work with arrangements - allude to them by name and portray totally, including convergences of all reagents, and pH of watery arrangements, dissolvable if non-fluid.

Result

Must add result in your article.

A Good Result :-

Results are as per aims and objective and useful to further research .

Conclusion

In Ratnagiri district at tehsil level, it is found that socio-economic development is confined to Ratnagiri and Chiplun tehsils. Ratnagiri is the headquarters and industrial centre of the district and Chiplun has an industrial and nodal point that benefits the development. Hence the development appears to be partly focusing on the individual centres.

A Good Conclusion :-

Choose if the trial outline satisfactorily tended to the speculation, and whether it was legitimately controlled. Attempt to offer option clarifications if sensible options exist.

REVIEWER COMMENTS

- I discover no shortcoming at all with the routines, information examination, or conclusions.
- The work, as with all work advancing from this specific gathering, is generally sound.
- My remarks here are concerned singularly with the association of the composition.
