#### ABSTRACT

Dhule district is a tribal district of Maharashtra state. The district is inhabited by 40% of tribal population, habitually with their discrete way of life, customs, dialects and cultural tradition. These tribals exploit local food and vegetable plants for various diseases among themselves through the experiences. Women's specifically know the ethnomedicinal values in traditionally used plants. Much of this wealth is preserved as an unwritten material medico of the tribal folk.

### Introduction

Plants have been used since prehistoric times for treatment of various ailments. India has second largest tribal population was 8.2% of country's population (Census 2001). Tribal people mostly depend on forest for their livelihood. Tribal communities residing in the hilly areas are solely dependent on this readily available resource.

#### A Good Introduction :-

*Depict the significance (importance) of the study - why was this value doing in any case? Give a wide connection. Extremely briefly depict the exploratory configuration and how it achieved the expressed destinations.*

### Materials

The present authors visited in Satpura zone in Shirpur Tahsil of Dhule District mainly comprises Vakvad, Zende Anjan, Amba, Khambala, Rohini, Bhoity, Sangvi, Palasner, Sule, Khairkhuti. Initial visits were planned only for establishing good acquaintance with tribal people and collection of plants.

#### A Good Materials :-

*Materials may be accounted for in a different passage or else they may be distinguished alongside your systems. In biosciences we habitually work with arrangements - allude to them by name and portray totally, including convergences of all reagents, and pH of watery arrangements, dissolvable if non-fluid.*

### Result

The present study among the different tribes, with respect to traditional healers, tribal priests and women recorded medicinal uses of 32 plant species in the treatment of infant diseases. Based on the interviews conducted, it is evident that the knowledge is limited to adult population living in this region.

#### A Good Result :-

*Give a setting, for example, by depicting the inquiry that was tended to by mentioning a specific observable fact. Portray aftereffects of control investigations and incorporate perceptions that are not exhibited in a formal figure or table, if proper.*

### Conclusion

Must add Conclusion in your article.

#### A Good Conclusion :-

*Thus, the research have wider scope for new academician and research scholars.*

### REVIEWER COMMENTS

- The writing audit was careful, the approach was carefully exhaustive and fused the utilization of sufficient quantities of tests in dust size examination and blast tests.
- I discover no shortcoming at all with the routines, information examination, or conclusions.
- The work, as with all work advancing from this specific gathering, is generally sound.
