#### ABSTRACT

Research can be referred to as the systematized efforts to gain new knowledge. Usually in order to interpret the results of a business research we will be using many tools such as Chi Square, F,T,ANOVA, etc for which we will be using software such as POM,TORA,SPSS etc. The Hybrid and Upgraded version of such software is now available for the researcher to undertake research effectively and its popularly known as SEM Modeling .Structural equation modeling (SEM)

### Introduction

Structural equation modeling (SEM) is a general term used to describe a family of statistical methods designed to test a conceptual or theoretical model. Some common SEM methods include confirmatory factor analysis, path analysis, and latent growth modeling. This article deals in detail about the various aspects of SEM Modeling in Business research

#### **A Good Introduction :-**

*Depict the significance (importance) of the study - why was this value doing in any case? Give a wide connection. Extremely briefly depict the exploratory configuration and how it achieved the expressed destinations.*

### Materials

Must add methods and materials in your article.

#### **A Good Materials :-**

*Methods & Materials used to per research topic.*

### Result

Must add result in your article.

#### **A Good Result :-**

*Results are as per aims and objective and useful to further research.*

### Conclusion

SEM is very valuable method for developing and testing theories in business research. Various features and software available further increase the technique's versatility, allowing researchers to test more complex relationships among the variables.

#### **A Good Conclusion :-**

*The research have wider scope for new academician and research scholars.*

### REVIEWER COMMENTS

- This was a superb give an account of extremely intensive examination.
- The writing audit was careful, the approach was carefully exhaustive and fused the utilization of sufficient quantities of tests in dust size examination and blast tests.
- I discover no shortcoming at all with the routines, information examination, or conclusions.
- The work, as with all work advancing from this specific gathering, is generally sound.
