### ABSTRACT

Anxiety is a state of tension, it is a drive like hunger or sex but instead of arising from internal tissue conditions, it is produced originally by external cues. It is an unpleasant emotional state in which a present and continuing strong desire or drive seems likely to miss its goal. The cause of basic anxiety is the result of competitive feeling between the individual and the group. In general anything that disturbs the security of the child in relation to his parents produces basic anxiety.

### REVIEWER COMMENTS

- I discover no shortcoming at all with the routines, information examination, or conclusions.
- The work, as with all work advancing from this specific gathering, is generally sound.
- My remarks here are concerned singularly with the association of the composition.
- Thought of these focuses will, I accept, lead to an enhanced report that
