#### ABSTRACT

Prof. Gunnar Myrdal has rightly described the relationship of industrialization and economic development where he observes that, "the manufacturing industry represents, in a sense, a higher stage of production in advanced countries. The development of manufacturing has been associated with these countries spectacular economic progress and rise in levels of living." Industrialization is an effective means for solving the problems of economic and social progress in developing countries of the world.

### REVIEWER COMMENTS

- My remarks here are concerned singularly with the association of the composition.
- Thought of these focuses will, I accept, lead to an enhanced report that better shows the key ideas and conclusions.
- Generally, this is a reasonable, brief, and elegantly composed original copy.
