ABSTRACT

Education is a key factor for the rapid development of a country. It is not only the fruit of contemplation but an instrument of change also. In the present study attempt has been made to study the decadal variation in sex disparity in literacy of scheduled Tribe population and change in male-female literacy rate in Nandurbar district for the period 1991 to 2001. The present study based on the secondary data has been collected from district census hand book of Dhule and Nandurbar district.

Introduction

As a matter of convenience, literacy is defined as the ability to read and write one's name in one's mother-language.

In India all those persons who can both read and write a simple message with understanding in any language are classified as literate.

A Good Introduction :-

Depict the significance (importance) of the study - why was this value doing in any case? Give a wide connection. Extremely briefly depict the exploratory configuration and how it achieved the expressed destinations.

Materials

The present work is based on secondary data. The secondary data is obtained from district census handbook of Dhule and Nandurbar district of 1991 and census of 2001. To calculate the literacy rate formula will be used as given below. Literacy rate = $L / P \times 100$

A Good Materials :-

Materials may be accounted for in a different passage or else they may be distinguished alongside your systems. In biosciences we habitually work with arrangements - allude to them by name and portray totally, including convergences of all reagents, and pH of watery arrangements, dissolvable if non-fluid.

Result

Must add result in your article.

A Good Result :-

Results are as per aims and objective and useful to further research.

Conclusion

In the present paper, the researcher has found the disparity rate of Schedule Tribe community based on literacy rate provided by the information of census 1991 and 2001, from the above discussion, it is seen that if the female literacy rate is increased then disparity index is observed decreased.

A Good Conclusion :-

Choose if the trial outline satisfactorily tended to the speculation, and whether it was legitimately controlled. Attempt to offer option clarifications if sensible options exist.

REVIEWER COMMENTS

- The writing audit was careful, the approach was carefully exhaustive and fused the utilization of sufficient quantities of tests in dust size examination and blast tests.
- I discover no shortcoming at all with the routines, information examination, or conclusions.
- The work, as with all work advancing from this specific gathering, is generally sound.
