ABSTRACT

In the global world, educational institutions perform a significant function by providing the learning experiences and leads towards the light of knowledge rather than the darkness of ignorance. The institutions are not run by big officers, bureaucrats or administrative person but it's a teacher who plays great responsibility for the society by teaching and provide the oceans of knowledge to the students. It is true that, the mother is the first school of a child, but she cannot provide that what a teacher can provides to a student.
