ABSTRACT

The main objective of the present study is to compare self concept of tribal and non tribal players from Chhattisgarh. For present study, 200 intercollegiate tribal players (Ave. age 20.23 yrs.) and 200 intercollegiate non tribal players (Ave. age 19.90 yrs) were selected as sample. The criteria for selection of subjects were participation in intercollegiate tournaments for any sports discipline. The selection of subjects was done from colleges under the jurisdiction of various Universities

Introduction

Learned beliefs, attitudes and opinion hold by an individual towards his/her personal existence depends upon a complex, organised and dynamic system. According to Baumeister (1999) self concept is the individual's belief about himself or herself, including the person's attributes and who and what the self is.

A Good Introduction :-

Depict the significance (importance) of the study - why was this value doing in any case? Give a wide connection.

Materials

For present study, 200 intercollegiate tribal players (Ave. age 20.23 yrs.) and 200 intercollegiate non tribal players (Ave. age 19.90 yrs) were selected as sample. The criteria for selection of subjects were participation in intercollegiate tournaments for any sports discipline.

A Good Materials :-

Depict materials independently just if the study is complicated to the point that it spares space thusly. Incorporate specific chemicals, organic materials, and any gear or supplies that are not generally found in research centers.

Result

On the basis of statistically analysis it was found that, self concept in non tribal players are significantly better as compared to tribal players. It may be due to the fact that, tribal belongs economically and socially backward class.

A Good Result :-

In content, depict each of your outcomes, guiding the per user toward perceptions that are generally significant.

Conclusion

On the basis of results it was concluded that tribal, non tribal belongingness do affect self concept of sportsperson.

A Good Conclusion :-

Clarify the majority of your perceptions however much as could be expected, concentrating on systems. Choose if the trial outline satisfactorily tended to the speculation, and whether it was legitimately controlled.

REVIEWER COMMENTS

- The work, as with all work advancing from this specific gathering, is generally sound.
- My remarks here are concerned singularly with the association of the composition.
- Thought of these focuses will, I accept, lead to an enhanced report that better shows the key ideas and conclusions.
- Generally, this is a reasonable, brief, and elegantly composed original
