ABSTRACT

The purpose of this note is to point out that composition of the agriculture growth has changed significantly. Changing composition is a reflection of the changing economic conditions, composition of demand, and evolving challenges faced by the vast majority of smallholders in India. To sustain pro poor growth in the sector, one has to take into account the possible future drivers of agricultural growth. It is therefore important to understand how policy induced adoption and greater area allocation to high value crops by marginal

REVIEWER COMMENTS

- The work, as with all work advancing from this specific gathering, is generally sound.
- My remarks here are concerned singularly with the association of the composition.
- Thought of these focuses will, I accept, lead to an enhanced report that better shows the key ideas and conclusions.
- Generally, this is a reasonable, brief, and elegantly composed original
