ABSTRACT

The present study was conducted with an aim to study the assertiveness among Muslim adolescent girls in relation to selected demographic variables. The study also aimed to find the association between assertiveness and the parenting style adopted by the mothers of the selected girls. For the present study, 1500 Muslim girls studying in Muslim minority Arts and Science Colleges and Muslim Minority Engineering Colleges in Chennai Metropolitan Area, Tamil Nadu were selected. The Rathus Assertiveness Schedule (Rathus, 1973)

²Associate Professor and Head Of Home Science Department Avvaiyar Government College For Women, Karaikal .

Introduction

India being a diverse country in terms of ethnicity, religion and culture, has Muslims as its largest minority group. Muslim women form a significant part of Islamic society in India. However Muslim women are far more backward than the other women in India.

A Good Introduction :-

Depict the significance (importance) of the study - why was this value doing in any case? Give a wide connection. Extremely briefly depict the exploratory configuration and how it achieved the expressed destinations.

Materials

Selection of area: The selected location for the study was Chennai, the capital city of a southern state of India, namely Tamil Nadu. The area for conducting the present investigation was the Muslim minority arts and science colleges and engineering colleges in Metropolitan Area of Chennai.

A Good Materials :-

Methods & Materials used to per research topic.

Result

A. Assertiveness among the Muslim girls based on the demographic variables

A Good Result :-

Abridge your discoveries in content and show them, if fitting, with figures and tables. In content, depict each of your outcomes, guiding the per user toward perceptions that are generally significant.

Conclusion

The results of the present investigation shows that assertiveness of the girls is significantly different based on their father's qualification. It was noted that girls of fathers who are illiterates exhibited least assertiveness and girls of professional fathers scored highest on assertiveness scores.

A Good Conclusion :-

You may propose future headings, for example, how the analysis may be adjusted to achieve an alternate target. Clarify the majority of your perceptions however much as could be expected, concentrating on systems.

REVIEWER COMMENTS

- The writing audit was careful, the approach was carefully exhaustive and fused the utilization of sufficient quantities of tests in dust size examination and blast tests.
- I discover no shortcoming at all with the routines, information examination, or conclusions.
- The work, as with all work advancing from this specific gathering, is generally sound.
