ABSTRACT

Human life, in all its stages, is blessed with growth and development. Ageing is a multidimensional phenomenon and is affected by a combination of physical, psychological and socioeconomic factors. Aim of the study is to assess and compare Ways of Coping between elderly people living in old age home and within the family setup. The study was conducted at two Old age home and two areas of Ranchi Kantatoli and Kanke.

Review of the Article:

The present study focuses on **Ways of Coping Among Elderly People Living in Old Age Home & Within Family Setup**. The introduction builds a logical case and context for the problem statement. The title is clear and informative. The title is representative of the content and breadth of the study.

Abstract:

The abstract is complete, essential details are presented. The results in the abstract are presented in sufficient and specific detail. The conclusions in the abstract are justified by the information in the abstract and the text. There are no inconsistencies in detail between the abstract and the text.

Reference to the Literature and Documentation:

The literature review is up-to-date. The number of references are appropriate and their selection is judicious. The review of the literature is well integrated.

Population and Sample:

The population is defined clearly, both for subjects (participants) and stimulus (intervention), and is sufficiently detailed to permit the study to be replicated.

Instrumentation, Data Collection:

The measurement instrument is appropriate given the study's variables; the scoring method is clearly defined. The data set is sufficiently described.

Conclusions:

The conclusions are clearly stated; key points stand out. The conclusions follow from the design, methods, and results; justification of conclusions is well articulated.

Scientific Conduct:

There are no instances of plagiarism. Ideas and materials of others are correctly attributed. Ideas and materials of others are correctly attributed

Presentation and Documentation:

The text is well written and easy to follow. The vocabulary is appropriate. The content is complete and fully congruent. Reference citations are complete and accurate. Must add some figures & graphs for better presentation of the results. Practical significance or theoretical implications are discussed; guidance for future studies is offered.

Overall the study is relevant to the mission of the journal or its audience.

SUMMARY OF ARTICLE

No.		Very High	High	Average	Low	Very Low
1.	Interest of the topic to the readers	✓				
2.	Originally & Novelty of the ideas		✓			
3.	Importance of the proposed ideas	✓				
4.	Timelines		✓			
5.	Sufficient information to support the assertions made & conclusion drawn	✓				
6.	Quality of writing (Organization, Clarity, Accuracy Grammer)			✓		
7.	References & Citation (Up-to-date, Appropriate Sufficient)		✓			

FUTURE RESEARCH SCOPE:

1. Alcohol-related deaths in India
2. Crime in India
3. Indian criminals
4. Indian drug traffickers
5. Indian Administrative Service officers convicted of crimes
