ABSTRACT

Stress is a silent killer and a major root cause beneath the onset of other lifestyle diseases like Diabetes, Heart diseases, Obesity, Alzheimer's disease, Parkinson's disease, Cancer etc. The present study was carried out to compare the level of occupational stress between doctors and academicians. Sixty four subjects aged 30-60 yrs. were selected by purposive random sampling technique from Rohtak area of Haryana, India. A self-designed questionnaire was formulated to elicit information regarding the socio-economic and work profile of subjects. Occupational Stress Index was used to assess the level of occupational stress.

Review of the Article:

The present study focuses on Comparative Analysis Of Occupational Stress Level Of Doctors And Academicians. The introduction builds a logical case and context for the problem statement. The problem statement is clear and well articulated.

Abstract:

The abstract is complete, essential details are presented. The results in the abstract are presented in sufficient and specific detail. The conclusions in the abstract are justified by the information in the abstract and the text. There are no inconsistencies in detail between the abstract and the text.

Title, Authors:

The title is clear and informative. The title is representative of the content and breadth of the study (not misleading). The title captures the importance of the study and the attention of the reader.

Reference to the Literature and Documentation:

The literature review is up-to-date. The number of references are appropriate and their selection is judicious. The review of the literature is well integrated.

Research Design

The research design is defined and clearly described, and is sufficiently detailed to permit the study to be replicated.

Population and Sample

The population is defined clearly, both for subjects (participants) and stimulus (intervention), and is sufficiently detailed to permit the study to be replicated. The sampling procedures are sufficiently described. Subject samples are appropriate to the research question.

Instrumentation, Data Collection:

The measurement instrument is appropriate given the study's variables; the scoring method is clearly defined. The data set is sufficiently described.

Data Analysis and Statistics

Data analysis procedures are sufficiently described, and are sufficiently detailed. Statistical tests are appropriate.

Presentation and Documentation:

The text is well written and easy to follow. The vocabulary is appropriate. The content is complete and fully congruent.

Scientific Conduct

There are no instances of plagiarism. Ideas and materials of others are correctly attributed.

SUMMARY OF ARTICLE

No.		Very High	High	Average	Low	Very Low
1.	Interest of the topic to the readers	✓				
2.	Originally & Novelty of the ideas		✓			
3.	Importance of the proposed ideas	✓				
4.	Timelines		✓			
5.	Sufficient information to support the assertions made & conclusion drawn			✓		
6.	Quality of writing (Organization, Clarity, Accuracy Grammer)		✓			
7.	References & Citation (Up-to-date, Appropriate Sufficient)		✓			

FUTURE RESEARCH SCOPE:

- 1.Study Of Drug Addiction patterns.
- 2.Various Ways of Coping With Stress and Stress Related Problems.
- 3.Effect of stress on Physical Health.
- 4.Effect of Stress on Academic Achievement of College going students.
- 5.Emotional Intelligence of old Age Peoples.
