REVIEW OF THE ARTICLE

Environmental Education (EE)

Dr. Pallavi Nilesh Vartak

ABSTRACT:

The problem statement was clear and well articulated Environmental education (EE) refers to organized efforts to teach how natural environments function, and particularly, how human beings can manage behavior and ecosystems to live sustainably. It is a multi-disciplinary field integrating disciplines such as biology, chemistry, physics, ecology, earth science, atmospheric science, mathematics, and geography. The term often implies education within the school system, from primary to post-secondary. But it should be done in such a way so that the teaching practices make long lasting impact on children. This will help in generations to come.

INTRODUCTION:

The introduction provides a good, generalized background of the topic that quickly gives the reader an appreciation The word EE means education about the environment i.e. Surroundings. It is about everything that surrounds us all, i.e. air, water, trees, mountains, animals, atmosphere, human beings and many more. Thus it is holistic. It not only enlightens us about these things but it tells to us what we can do to preserve the environment. EE is a process of learning about the existing situation through which sufficient knowledge can be gained to understand environmental problems and contribute towards solving them.

METHODOLOGY:

Author has not mentioned any specific methodology. This study was descriptive in nature. Must add methodology in your article. Methodology used to per research topic.

PRESENTATION OF RESULTS:

The amount of data presented was sufficient and appropriate. Tables, graphs, or figures were used judiciously and agree with the text Environmental education (EE) refers to organized efforts to teach how natural environments function, and particularly, how human beings can manage behavior and ecosystems to live sustainably. EE is a process of learning about the existing situation through which sufficient knowledge can be gained to understand environmental problems and contribute towards solving them. Saxena (1986) talks about EE as a process that promotes awareness and understanding of the environment, its relationship with man and his activities.

REFERENCES:

Prior publication by the author(s) of substantial portions of the data or study was appropriately acknowledged.

RELEVANCE:

The paper is properly organized and demands appreciation. I think the paper will satisfy the interest of the readers.

FUTURE RESEARCH SCOPE:

1. Career For Faculty (<http://academicprofile.org/Professor/CareerForFaculty.aspx>)
2. Academic Plan (<http://academicprofile.org/Professor/AcademicPlan.aspx>)
3. Regarding Professor Promotion (<http://academicprofile.org/Professor/regardingPromotion.aspx>)
4. Fellowship for Post Doctoral (<http://academicprofile.org/Professor/FellowshipForPD.aspx>)
5. Online Course on Research (<http://onlineresearch.in/Default.aspx>)

SUMMARY OF ARTICLE

		Very High	High	Average	Low	Very Low
1.	Interest of the topic to the readers		✓			
2.	Originally & Novelty of the ideas			✓		
3.	Importance of the proposed ideas	✓				
4.	Timelines			✓		
5.	Sufficient information to support the assertions made & conclusion drawn	✓				
6.	Quality of writing(Organization, Clarity, Accuracy Grammer)		✓			
7.	References & Citation(Up-to-date, Appropriate Sufficient)	✓				

Future Research Suggestions

This Article can expand further research for MINOR/MAJOR Research Project at UGC
