Golden Research Thoughts Journal is a multidisciplinary research journal, published monthly in English, Hindi & Marathi Language. All research papers submitted to the journal will be double - blind peer reviewed referred by members of the editorial board. Readers will include investigator in universities, research institutes government and industry with research interest in the general subjects.

CONTRIBUTION OF LIBRARY IN THE SUSTAINABLE DEVELOPMENT OF SOCIETY

Mrs. Meena Pawar

Librarian, S.V.C.S. B.Ed. College, Solapur.
B.Sc(Chemistry), DMLT, M.Lib& ISc., PGDBM.

ABSTRACT:

As library is knowledge center, I worked to check the hypothesis, if libraries can play the role to answer the need of knowledge which will be useful to decrease or to eradicate the problems of people, planet and prosperity which leads to sustained development of society and alternately of nation. By motivating and persuading the users to read the knowledge which will lead them to stand against unemployment, pollution, degradation of values, terrorism and poverty we can achieve the goal of sustained development UNO. All type of libraries especially academic libraries have key responsibilities to provide the knowledge to student not only for high profile job but also to develop entrepreneurship as well as to be on guard lest the destruction of planet through environmental safety book collection. Library have great chance to carry out the pilot experiments to prove that through library knowledge centre we can deliver not only the information and data to achieve the successful life but also Library can provide the information and knowledge to achieve the sustainable life also. Sustainable development of nation according to Mahatma Gandhi's thoughts.

KEYWORDS : Development Of Society , information and knowledge to achieve .

INTRODUCTION:

In Bhagwadgita Krishna delivered ever truth message for all human kind that knowledge is answer to all grief, miseries and problems of world. i.e. all the problems of world are experienced due to lack of knowledge. If we are become successful in providing write knowledge to student/ society at right time according to rule of Dury, we can achieve the goal of sustainable development of Nation

in the right sense.

OBJECTIVE:

- 1) To check the eligibility of libraries to overcome on the problems of people unemployment by providing them reference and referral services that will give them knowledge of entrepreneurship and different schemes of central and state government to avail the facilities.
- 2) To check the role of libraries to improve health of society.
- 3) To check the efficiency of collection of library to ensure environment safety.
- 4) To prove that In spite of nonprofit organization, may library spread the prosperity through knowledge of entrepreneurship, small scale production industries, different employment schemes, different loan schemes for self employment.
- 5) To achieve the gender equality and to

empower the women and girls by making them aware with the different educational, social, economical and safety schemes launched by state and central government.

6) To preserve the reading culture to develop and promote peaceful society to explore the principle justice for all.

HYPOTHESIS:

If library will develop the collection of its data in order to achieve the UNO's Millennium Development Goal (MDG) and Sustainable Development Goal (SDG).

Library is able to contribute the work to achieve the goal of UNOs development by providing right reading material which will meet the needs of development according to time.

METHODOLOGY:

This is philosophical, descriptive and experimental method of studies by using sampling tool. I have chooses one-three sample from each category of user I have discussed the hypothesis by discussing the examples designated as assessment studies and evaluation studies. Following are the characteristics of my research methodology that I have applied here.

- 1) It involves hypothesis formulation and testing.
- 2) It uses the logical methods of inductive-deductive reasoning to arrive at generalizations.
- 3) It may employ methods of randomization so that error may be estimated when population characteristics are inferred from observation of samples.
- 4) Variables and procedures are tried to describe accurately and completely to verify the replication.

This method may me philosophical as it has following objectives.

- To think about to improve current condition.
- To find out new facts and
- To suggest new applications

Tools Used:

Objects are established after conducting historical survey, case studies of great personalities who were using library as indivisible part of their routine. Documentary study and interview with sample persons are attempted. About ten libraries of different streams are studied and autobiographies of ten personalities are studied who were the ideal reader of libraries in their era and worked for human and national welfare. This proves that constant and gradual reading of books makes the reader's psychological foundation strong enough to aspire knowledge and inspire the life. Students, staff and research fellows' behaviors and mind settings are observed before and after the reading of knowledge related with person, planet and prosperity by interviewing and observing them.

Data Analysis:

Sustainable development of students/ users through the library efforts is the very needful job and librarian can play very vital role in regards. Sustainable development of nation concerned with the People, Planet and Prosperity of Society.

People:

Sr.No.	User	Information Provided About	Information Applied	Data Retrieved from	Result
1	Staff(2)	Anti Acidity Remedies	Yes	Online, Books	Positive Effect
2	Staff(2)	Anti Obesity	Yes	Online, Books	Positive Effect
3	Student (5)	Personality Development,	Yes	Books,	Positive Effect
4	Students, Staff	English Speaking Tips	Yes	Books, CD	Positive Effect
5	Research Fellow(6)	CAS and SDI Services	Yes	Reference Books, Journals, Online	Positive Effect

Libraries having great responsibility to make the society aware with the health updates, instructions and warning about epidemic diseases. Health updates tips. Healthy body support healthy minds and healthy minds activate the creation power of Brain. Every Public Library should play the role of not only as library but information center for all essential fundamentals of health such as vaccination timetable, diabetes, B.P. , Heart diseases, HIV Aids, from point view of awareness, symptoms, causes, and First aids.

Out of five users all are found developed, improved and proved themselves according to knowledge they aspired and today they are achieved their goals in regarding matter. That means in the development of People constituent library can play role with 100% results.

Planet:

Sr.No.	User/No	Information Provided About	Information Applied	Data Retrieved from	Result
1	Student	Land /Air/Water Pollution,	Yes	Online, Books CD, Reference	Positive Effect
2	Student	Disposable Waste, of Sound	Yes	Books, Journals,	Positive Effect
3	Student	Pollution, Plantation and of	Yes		Positive Effect
4	Student	Prevention plastic use, of	Yes		Positive Effect
5	Student		Yes		Positive Effect

Prosperity:

Sr.No.	User	Information Provided A bout	Information Applied	Data Retrieved from	Result
1	Staff	Employment News, e-rojgar,	Yes	News paper, weekly journals,	Positive Effect
2	Staff	www.maharojgar , different bank websites of employment, Job appointments.	Yes	magazines, Internet.	Positive Effect
3	Staff		Yes		Positive Effect
4	Student		Yes		Positive Effect
5	Student		No		No effect

Users always use this source of knowledge to know the ways of entrepreneurships, nature of economy and bank /loan facilities. Student became aware with the Job assured fields, job non assured, scope for new inventions and applications. This is not short experiment but it is long observed process.

FINDINGS:

Throughout the experiment of checking the impact of library role in efforts of sustainable development of nation, we find that if peoples are motivated, inspired towards right direction to prove themselves and improve the present conditions they can do it definitely. For this they need only proper knowledge, reference source of knowledge, proper reference, referral services and its timely retrieval. All these are the job responsibilities of any Public/ academic library. i.e. Library can play the his role with the help of latest technology. All the users are found positively affected by reading the knowledge of development of planet, people and prosperity. Staff who was working as library attendant in small & private library used information from employment news weekly Gov. Publication and got the Job in Central Gov. There will be so many cases all over 100% reader who came across the health knowledge material became a health conscious to remain fit. Reading about the pollution and its hazardous effects makes the reader to think about human being's mistakes and ways to overcome on it. Effects of reading of such knowledge are not quick process but it is unwritten long life deal with self behavior.

DISCUSSION:

Providing and managing library resources and motivating to use library resources and observe the impact of knowledge whatever he/she gained into their actual life site is the main structure and function of this research. About studying and observing about 10 colleges for the period of last 10 years record of library user is the strength and duration of research. Providing curriculum knowledge of any coursework is main function of Librarian. Librarian should do this function properly to achieve the development of student/ people who will make the sustainable developed society. To cover the areas of planet and prosperity library should be well arranged with the required collection of resources of knowledge and its proper display to attract and motivate people accordingly.
