Author's Profile

Kanchan Wani
Srikakulam

Present Designation: Research Scholar, Post Graduate Department of Geography, Moolji Jaitha College, Jalgaon, Maharashtra, India.

Additional Key Positions: M.Sc (Geoinformatics)

Short Profile:

Kanchan Wani is a Research Scholar at Post Graduate Department of Geography in Moolji Jaitha College, Jalgaon, Maharashtra, India. She has completed M.Sc (Geoinformatics). She has professional experience of lecturer in Geoinformatics (Moolji Jaitha College, Jalgaon), associate Research Scientist (JalaSRI, Moolji Jaitha College, Jalgaon) from November 2009 to January 2011 (1 year 2 months) and project Associate (All India Institute of Local Self Government, Pune) from May 2011 to August 2012 (1 year 3 months).

ABSTRACT:

In developing country like India, the right to safe and sustainable access to urban water supply and sanitation services & efficiency of the Urban Local Bodies (ULBs) in service delivery of these basic services to meet the growing demands and aspirations of their citizens is a very crucial issue. The issues of access to basic services to all, including the urban poor including those living below poverty line, slums and un-served, are complex and cannot be seen in isolation.

Abstract Report: The Title Accurately Said The Study was About.

INTRODUCTION:

An Urban Local Body (ULB) is bind to provide basic services i.e. water supply, sewerage (sewage & drainage), solid waste management & storm water drainage in its jurisdiction to all its citizens including urban poor and slum dwellers. Many people lack affordable and sustainable access to safe water and hygienic sanitation facilities in urban areas. Majority of them are residing in slums and other unserved areas.

Introduction Report: This Article Include Full Introduction, Methods, Results & Introduction Section.

METHODS & MATERIALS:

Study Area: Located in Jalgaon shiwar, near the railway line, Shahu Nagar A-90 is a notified slum & lies in 9th prabhag of Jalgaon City Municipal Corporation. The slum is located in core city area, surrounded by residential & commercial area. The slum appeared in gazette on 25-12-97. As per census 2011, population of Shahu Nagar A-90 is 900 with 149 hutments. Shahu Nagar A-90 slum is located on private land with status of land tenure as illegal encroachment.

Methods & Materials Report: Tables/Boxes/Diagram & Images are Used to Explain Specific Points or Background Information. Figures That The Plotted Parameters are Clearly Mentioned.

RESULT:

City Wide Service Level Benchmarking:

Plotted below is graph showing the SLB values for Jalgaon city level for FY 2008-09, 2009-10, 2010-11 & 2011-12. Coverage's of water supply, toilets, sewerage network & door to door solid waste management services is taken into consideration for 4 years & compared with the benchmark values.

Result Report: Figures are Imported to Provide Explanation for Background Information. Conclusion of This Paper Clearly Supported Results.

CONCLUSION:

The comparative analysis of SLB values for the Jalgaon city wide & slum level highlights the inequity in UWSS service provided by the ULB. The research puts thrust on using SLB as a tool for efficient investment in the service delivery of UWSS especially to the poor and un-served.

Conclusion Report: The Text is Rounded off with a Conclusion that Discusses the Implication of The Findings & Ideas Discussed & Their Impact on Future Research Direction.
