### ABSTRACT

The study of human resources-their quality, problems and remedies- is of immense use in planning in both developing as well as developed economies. Since human beings constitute the workforce, knowledge relating to them is of immense necessity. those people were included under the category of agricultural workers who possessed some land or were rural artisans but who worked 50 per cent or more days on the land of others against payment of wages.

### Introduction

Human resources constitute a significant input in the production process of goods and services of an economy. The study of human resources-their quality, problems and remedies- is of immense use in planning in both developing as well as developed economies.

#### **A Good Introduction :-**

*Depict the significance (importance) of the study - why was this value doing in any case? Give a wide connection. Extremely briefly depict the exploratory configuration and how it achieved the expressed destinations.*

### Materials

Must add methods and materials in your article.

#### **A Good Materials :-**

*Methods & Materials used to per research topic.*

### Result

Must add result in your article.

#### **A Good Result :-**

*Results are as per aims and objective and useful to further research .*

### Conclusion

The caste composition of marginal farmers and agricultural labours are entirely different. Naturally average sizes of land holdings as well as live stock holdings are larger for marginal farmers than agricultural labours. But average value of households' assets of marginal farmers and agricultural labours is almost equal.

#### **A Good Conclusion :-**

*You may propose future headings, for example, how the analysis may be adjusted to achieve an alternate target. Clarify the majority of your perceptions however much as could be expected, concentrating on systems.*

### REVIEWER COMMENTS

- The writing audit was careful, the approach was carefully exhaustive and fused the utilization of sufficient quantities of tests in dust size examination and blast tests.
- I discover no shortcoming at all with the routines, information examination, or conclusions.
- The work, as with all work advancing from this specific gathering, is generally sound.
