REVIEW OF THE ARTICLE

Self-Esteem In The Wives Of Alcoholic Spouses – A Study

Sr. Niranjana Anthonisamy¹ and Dr. J. Godwin Premsingh²

ABSTRACT:

The problem statement was clear and well articulated. The patterns of alcohol intake around the globe are constantly evolving and alcohol is ubiquitous today. Alcohol dependency is seen today as the world's highly prevalent public health problem and therefore alcoholism is a matter of serious concern, not confined to any group, culture or country. The influence of the husband's alcoholism generates crisis for the wife and disturbs family's equilibrium. Specifically the wives of alcoholic spouses experience manifolds of physical, psychological and sexual threats and consequently they develop depression, guilt, tension, fear, loss of trust, low self-esteem and high suicide risk.

INTRODUCTION:

The introduction provides a good, generalized background of the topic that quickly gives the reader an appreciation. Feelings of worth can flourish only in an atmosphere where individual differences are appreciated, mistakes are tolerated, communication is open, and rules are flexible - the kind of atmosphere that is found in a nurturing family" Virginia Satir. METHODOLOGY:

The present study was exclusively realized on secondary data sources. It was purely descriptive type of research since it describes the facts relating to the problem. The present study is done among wives of alcoholic spouses who accompanied their husband for treatment at SOCSEAD (Sisters of the Cross Society for Education and Development) Trichy, from May 2016 to August 2016.

PRESENTATION OF RESULTS:

The amount of data presented was sufficient and appropriate. Tables, graphs, or figures were used judiciously and agree with the text. The wife of an alcoholic spouse has low self-esteem and a negative self-picture caused by verbal or physical violence, social withdrawal, sadness and problems at work simply due to the alcoholic partner's unbalanced behaviour.

REFERENCES:

Prior publication by the author(s) of substantial portions of the data or study was appropriately acknowledged.

RELEVANCE:

The paper is properly organized and demands appreciation. I think the paper will satisfy the interest of the readers.
